Navigational display Makes Setup a Snap

The instrument features a simple configuration, with Operation mode for normal use, and Setting mode for use during setup. In Operation mode, measured values, time, and alarms are updated, and lists are printed. In Setting mode, you can enter measuring ranges, alarm values, and other parameters. Also, Setting mode offers a navigational display that eases entry of settings.

Navigational display to support the settings (Example: Range Setting)

Internal Illumination

By using a high intensity white LED and light diffusing rod for the internal illumination, the visibility of the chart section has been greatly increased.

Chart Ejection Function

The chart cassette is equipped with a chart ejection function. You can write memos on the chart and check the historical trend during recording.

High Reliability and High Quality

Highly Precise & High Reliability of Actuators

The pen servo takes advantage of an ultra-small, rack-and-pinion stepping motor. By eliminating the drive belt, transfer-related loss load is reduced, allowing a smaller servo. The motor is controlled digitally, yielding reductions in power consumption. Also, the position of the pen is detected by an optical encoder.

Servo Unit

Long Life & High Speed Scanning

For scanners that switch the input signal, high withstand voltage, low leakage current MOS FETs and high voltage output photocouplers have been combined into a high withstand voltage semiconductor relay offering high speed (6 points per second) scanning, longer scanner life, and noiseless operation. High integrated circuit achieve reducing power consumption, suppressing heat emissions, and increasing the lifespan of components.

Light Weight & Low Power Consumption

High integrated circuit and the new servo unit achieve high efficiencies and low heat emissions in all of the 1-, 2-, 3-, and 4-pen and 6-dot models while simultaneously limiting the weight to approximately 2.5 kg (6-dot model), and approximately 2.4 kg (4-pen model).

Input signal switch circuit

Compatible to previous model (SBR-EY100 Series)

The felt-pen, plotter pen, cassette ribbon and chart paper are compatible to previous models (SBR-EY100 series).

Rear terminal plate and depth size is same to previous models (SBR-EY100 series).
